

Claims

What is claimed is:

1 1. A method performed by a computer system, comprising:
2 storing a version of a mass-produced printed paper;
3 identifying at least a subset of characters within the version; and
4 in response to the identified subset, forming at least one hyperlink within the version,
5 the version being displayable on a display device as a likeness of the paper including an
6 indicator of the hyperlink.

1 2. The method of Claim 1 wherein the forming comprises:
2 forming the hyperlink within a first portion of the version, wherein a second portion
3 of the version is displayable on the display device in response to a selection of the indicator.

1 3. The method of Claim 2 wherein the forming comprises:
2 forming the hyperlink within a first portion of the version, wherein the first portion of
3 the version is displayable on the display device as a likeness of a first portion of the paper,
4 and wherein a second portion of the version is displayable on the display device as a likeness
5 of a second portion of the paper.

1 4. The method of Claim 1 wherein the forming comprises:
2 forming the hyperlink within a portion of the version, wherein a document is
3 displayable on the display device in response to a selection of the indicator.

1 5. The method of Claim 1 wherein the forming comprises:
2 forming the hyperlink within a portion of the version, wherein a website is
3 displayable on the display device in response to a selection of the indicator.

1 6. A system, comprising:
2 a computing device for:
3 storing a version of a mass-produced printed paper;
4 identifying at least a subset of characters within the version; and
5 in response to the identified subset, forming at least one hyperlink within the
6 version, the version being displayable on a display device as a likeness
7 of the paper including an indicator of the hyperlink.

1 7. The system of Claim 6 wherein a second portion of the version is displayable
2 on the display device in response to a selection of the indicator.

1 8. The system of Claim 7 wherein the first portion of the version is displayable
2 on the display device as a likeness of a first portion of the paper, and wherein a second
3 portion of the version is displayable on the display device as a likeness of a second portion of
4 the paper.

1 9. The system of Claim 6 wherein a document is displayable on the display
2 device in response to a selection of the indicator.

1 10. The system of Claim 6 wherein a website is displayable on the display device
2 in response to a selection of the indicator.

1 11. A computer program product, comprising:
2 a computer program processable by a computer system for causing the computer system to:
3 store a version of a mass-produced printed paper;
4 identify at least a subset of characters within the version; and
5 in response to the identified subset, form at least one hyperlink within the version, the
6 version being displayable on a display device as a likeness of the paper
7 including an indicator of the hyperlink; and

PATENT

Docket No.: 28150.5

8 an apparatus from which the computer program is accessible by the computer system.

1 12. The computer program product of Claim 11 wherein a second portion of the
2 version is displayable on the display device in response to a selection of the indicator.

1 13. The computer program product of Claim 12 wherein the first portion of the
2 version is displayable on the display device as a likeness of a first portion of the paper, and
3 wherein a second portion of the version is displayable on the display device as a likeness of a
4 second portion of the paper.

1 14. The computer program product of Claim 11 wherein a document is
2 displayable on the display device in response to a selection of the indicator.

1 15. The computer program product of Claim 11 wherein a website is displayable
2 on the display device in response to a selection of the indicator.

DECODED - NOV 2000
